

## Innovation in spraybooth technology ...

Founded in 1992 by Directors Mike Williams and Ray Arthur, Spraybooth Technology Limited is a company owned by engineers and run by engineers, with proven expertise gained in lifetime careers in the vehicle refinishing industry.

STL has since grown to become one of the UK's leading spraybooth manufacturers, with a rapidly growing customer base across a broad range of industries.

STL's head office in Sudbury, Suffolk, provides the ideal environment for developing the innovative spraybooth solutions for which STL has become renowned, with a manufacturing facility located in nearby Halstead.

Dedicated project management, in-house design, nationwide after sales, and professional sales and customer support is all on hand to ensure STL customers get what they want, when they want, with excellence supplied as standard.

## Experience and expertise ...

### Automotive and Smart Repair

The Gemini II EnergySaver spraybooth is one of the most significant developments in automotive spraybooth design since water based paints. Using up to 75% LESS energy in spray mode than other equivalently specified spraybooths, the Gemini II EnergySaver showcases Spraybooth Technology at its very best.

Complimented by a complete range of spraybooths dedicated to the automotive market, including Wheel SprayOut facilities and innovative curtained Smart Repair enclosures, STL's creative designs guarantee quality, productivity and efficiency with every installation.

### Commercial Vehicle and Rolling Stock

STL thrives on innovation and design, having designed and installed bespoke spraying facilities for some of the largest CV and train manufacturers and repairers in the UK.

Each standalone spraybooth is tailored to the customers exact requirements and combines optimum finish quality with fast production.

Alternatively, our flexible approach means a work bay can be converted into a fully functional spraybooth for a fraction of the cost of a conventional spraybooth.

## Industrial

As word of our capabilities spreads, demand for our products and services grows, and we are now increasingly involved in large-scale overseas projects.

Our innovative approach to creating paint application facilities combines the latest industrial processes with efficiency, rapid throughput and exceptional quality.

Our unique design capability allows us to fully-conveyorise automated preparation and coating lines for a wide variety of products and industries.

## Aerospace

From the most intricate aircraft components and internal fittings, to complete military and civil aircraft, STL has met and exceeded the diverse needs of this very specialised industry.

Our customers include, but are not limited to, the Ministry of Defence, Gardiner Aerospace, Air Livery, MEL Aviation and GKN Aerospace.

MODEL NO. 21. PRED. MODEL  
MODEL NO. 21. PRED. MODEL

OPERATING INSTRUCTIONS  
1. Turn the main power switch to the 'ON' position.  
2. Check the 'READY' indicator light.  
3. Select the appropriate exposure mode.  
4. Position the patient and the X-ray tube.  
5. Set the exposure parameters (kVp, mA, time).  
6. Press the 'START' button to initiate the exposure.  
7. Monitor the patient and the X-ray tube during the exposure.  
8. Press the 'STOP' button to terminate the exposure.  
9. Turn the main power switch to the 'OFF' position.  
10. Remove the patient and the X-ray tube.

## Nationwide servicing and support ...

Service is the cornerstone of STL's business, with a depth of knowledge and experience that is unequalled in the spraybooth industry. Our well-earned reputation for technical analysis and problem solving means we are often called upon to assess and resolve issues that other spraybooth "experts" leave in their wake.

### Professional Service

With a team of highly skilled Corgi-registered engineers strategically located throughout the UK, STL provides comprehensive maintenance, repair and breakdown cover for any make of spraybooth.

We pioneered the diagnostic technical helpline, which solves the majority of issues without even the need for a site visit, and when an engineer is required on site, 90% of breakdown calls are answered the same day!

### Tailored Maintenance Agreements

Peace of mind comes as standard with an STL Service Contract, which reduces the risk of inconvenient and costly breakdowns, and fulfils all your spraybooth legal requirements, including EPA, COSHH and smoke clearance testing.

### Energy Efficiency Upgrades

We offer a range of upgrades to improve the performance and energy efficiency of your spraybooth, including our leading AquaDry air agitation system, variable speed controls, air-cooled lighting, fully automated economy standby facility, and direct LPG gas-fired conversions.
