

Energy-Saving Spraybooth upgrades ...

The EMAC Energy Saver...

A clearance time safety monitor AND an energy-saving automatic shutdown system - all in one neat and cost effective package.

The EMAC upgrade system takes only a couple of hours to install and can be configured to your exact requirements... and will start saving you money straight away!

Burner Upgrades...

Conversion of indirect oil/gas burners to direct fired natural/LPG burners saving approximately 20-30% on fuel costs.

Lighting upgrades...

Pod Lighting upgrades - unique high efficiency air-cooled pod lighting system with light levels of approx 1400 lux.

The Clusterlite upgrade package from STL has major benefits over standard metal halide lamps and offers huge energy savings of up to 75%.

Spraybooth upgrades ...

AquaDry Air Agitation...

Automated AquaDry air agitation system significantly reduces flash off and cure times.

Control Panel Upgrades...

Retrofit of Inverta speed controllers and new control panel facilitates energy saving on standby, preparation and bake cycle.

The Ultimate Upgrade...

The Gemini II EnergySaver Spraybooth

Uses up to 75% less energy in spray mode than other equivalently specified spraybooths

- Unique air management technology
- Class-leading process times
- Fully automated control system
- Extended 8m long cabin
